

Trend Micro

PortalProtect™ 1.7

Comprehensive malware protection for Microsoft™ SharePoint™

Integrated collaborative environments are being increasingly adopted to share critical information, ideas, and technology. However, with Microsoft Office documents ranking as the third most common target of attack in 2006¹, they also represent a substantial security risk. Infected documents can jeopardize confidentiality and integrity of vital data, as well as business confidence—especially when collaborative environments expand to include customers, partners, and other affiliates.

Trend Micro PortalProtect provides comprehensive virus protection and file type filtering for Microsoft SharePoint. Optimization and integration with Microsoft™ SharePoint™ Portal Server and Windows™ SharePoint™ Services extends Trend Micro's leading enterprise security technology to protect these collaborative environments with minimal impact to servers and administrators. Additionally, PortalProtect collaborates with email and instant messaging security solutions as part of Trend Micro™ Enterprise Protection Strategy.

KEY FEATURES

Award-Winning Antivirus

- Prevents malware within Microsoft Office and other files from infecting SharePoint users
- Protects SharePoint data in the repository from corruption or theft by malicious code
- Stops high-risk and inappropriate files using "true file type" detection
- Offers added, automated protection during virus outbreaks

Optimized for SharePoint

- Supports SharePoint environments with complete Microsoft antivirus API implementation
- Ensures high scalability regardless of the number or size of SharePoint Portal Servers
- Improves scanning performance with multi-threaded scanning, agent-less database inspection and intelligent task scheduling
- Integrates with strategic Microsoft technologies, including Digital Dashboard, Web Parts, Web Storage System, and Microsoft Windows NT™ Security Model
- Minimizes use of network bandwidth by collaborating with other PortalProtect servers

Easy Administration

- Provides anytime access through a Web-based management console
- Enables remote or local configuration, deployment and management of a single server or multiple servers as a single group
- Ensures up-to-the-minute compliance with security policies through automatic updates
- Consolidates logs, reports and policy creation
- Displays security status on either a real-time Web console or SharePoint dashboard

SOFTWARE

Protection Points

- Portal Server

Threat Protection

- Antivirus
- Anti-Spyware
- Content Filtering

KEY BENEFITS

- Maintain integrity and confidentiality of SharePoint resources
- Protect SharePoint users, and their data, from malicious code
- Maximize SharePoint availability
- Minimize SharePoint administration

Blocks malware at the mail server	-	-	✓	-
Blocks malware at the messaging gateway	-	-	-	✓
Enables centralized management through Control Manager	✓	✓	✓	✓

SYSTEM REQUIREMENTS

CPU

- Intel™ Pentium™ III compatible processor

Memory

- 512MB or more

Disk Space

- 250MB free disk space; 8MB for the /tmp directory

Microsoft™ SharePoint™ Environment

- Microsoft SharePoint Portal Server 2003, 2007
- Microsoft Windows SharePoint Service 2.0, 3.0
- Microsoft Windows 2003 Server
- Microsoft SQL Server 2000 SP3 or above
- Microsoft Internet Explorer 5.0 (or above) for Web-based management
- Microsoft Internet Information Services (IIS) 6.0

Trend Micro™ Enterprise Protection Strategy

Trend Micro™ Enterprise Protection Strategy provides a comprehensive, multi-layered approach to network security. Trend Micro™ products and services are backed by TrendLabs™, a global network of research centers committed to constant threat surveillance and attack prevention.

Complementary Products

- Centralized Management
 - Trend Micro Control Manager
- Communication Server Security Products
 - ScanMail™ Products
 - IM Security for Microsoft Office Live Communications Server
- Gateway Security Products
 - InterScan™ Messaging Security Suite
 - InterScan™ Messaging Security Appliance
 - InterScan™ Messaging Hosted Security
 - InterScan™ Web Security Suite
 - InterScan™ Web Security Appliance
- Endpoint Security Products
 - OfficeScan™
